THE PRIVATE EQUITY CYCLE

HVPE provides a complete private equity solution for public investors by managing the portfolio through four phases of the private equity cycle to create value: Commitments, Investment, Growth, and Realisation. This comprehensive solution is designed to deliver shareholders strong returns over a multi-year investment cycle.

Commitments and Investment Pipeline

During May, HVPE committed \$50.0 million to HarbourVest's 2016 Co-Investment Fund, focused on buyout, growth equity, and mezzanine direct co-investments across geographies alongside top-tier private market managers. HVPE's existing HarbourVest fund commitments continued to make new investments.

HVPE's Investment Pipeline (unfunded commitments) of \$1.18 billion increased on a net basis by \$35.5 million during May based on the new HarbourVest fund commitment, capital funded, and foreign currency movement. Of the total investment pipeline, approximately \$785 million (67%) has been committed by HarbourVest funds to underlying partnerships.

Cash Invested

During May, HVPE invested \$11.0 million in HarbourVest international fund-of-funds and a global co-investment fund (compared to \$10.8 million in April).

NAV Growth

At 31 May 2016, HVPE's estimated Net Asset Value (NAV) per share is \$17.34 (£11.97), a \$0.33 and £0.33 per share increase from the 30 April 2016 estimate of \$17.01 (£11.64). This 1.9% increase compares to the MSCI All Country World Index (USD) decrease of 0.2% during May. This change resulted mainly from increasing valuations for privately-held investments as a portion of the portfolio was re-valued to reflect 31 March 2016 results and increasing values for publicly-traded holdings, and was partially offset by negative foreign currency movement and operating expenses of \$0.02 per share. During May, the euro depreciated 2.8% against the U.S. dollar.

Realisations Received

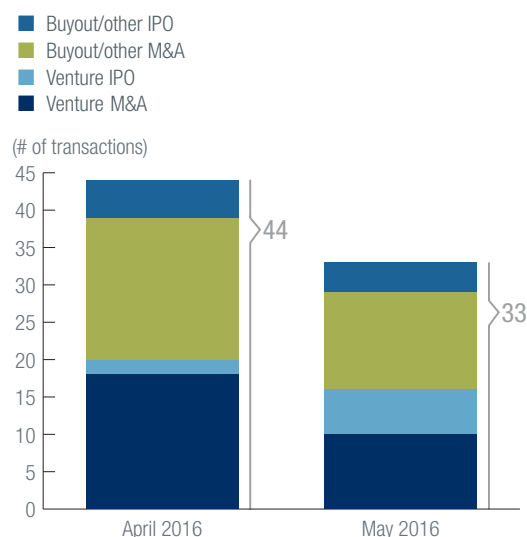

HVPE received \$8.5 million in realisations from HarbourVest U.S. and international fund-of-funds, a global secondary fund, and a global co-investment fund during May (compared to \$17.2 million in April). The largest source of realisations was direct co-investment fund HarbourVest 2007 Direct (sale of French food chain *Prosol Gestion* for approximately 2.5 times the HarbourVest fund's cost).

Liquidity Events

During May, there were a total of 33 liquidity events across HVPE's underlying portfolio (compared to 44 in April and a last 12-month average of 42). These included 23 M&A events and ten IPOs. The May 2016 IPOs included:

- Buyout-backed U.S. recovery audit service provider *Cotiviti* (COTV), held in the primary fund and secondary portfolios via Advent International
- Buyout-backed U.S. food distributor *U.S. Foods* (USFD), held in the primary fund, secondary, and Conversus portfolios via Clayton, Dubilier & Rice and KKR
- Buyout-backed Indian microfinance institution *Ujjivan* (UJJIVAN), held in the secondary portfolio via CX Partners and NewQuest Capital Advisors

HVPE LIQUIDITY EVENTS

MANAGING A LISTED PRIVATE EQUITY COMPANY

Throughout HVPE's ongoing cycle of Commitments, Investment, Growth, and Realisation, the Board (along with the Investment Manager) employs tools and policies to manage the risk and reward for the benefit of the Company's shareholders.

Credit Facility

HVPE currently has no drawings on its credit facility. At 31 May 2016, HVPE's cash (\$196.0 million) and available credit (\$500.0 million) total \$696.0 million. This represents 89% of commitments allocated to underlying partnerships and 59% of total commitments (compared to 95% and 61%, respectively, at 30 April 2016). The Rolling Coverage Ratio at 31 May is 101%. This reflects the sum of cash, available credit, and realisations expected to be received during the current financial year, taken as a percentage of the expected cash investments in HarbourVest funds over the current year plus the next two years. In considering forecast investments over a three-year period rather than total unfunded commitments, this calculation enables a more useful comparison of HVPE's coverage ratio relative to many of its peers.

Management of Foreign Currency Exposure

HVPE has exposure to foreign currency movements through foreign currency-denominated assets within the portfolio and through its unfunded commitments, which are long term in nature. The Company's most significant currency exposure is to euros. The Company does not actively use derivatives or other products to hedge the currency exposure.

PORTFOLIO DIVERSIFICATION NAV

Consistent with HVPE's investment objective, the investment manager strives to manage risk through diversification within the portfolio. The charts illustrate the breakdown of HVPE's investment portfolio at 31 May 2016.

PORTFOLIO DIVERSIFICATION AT 31 MAY 2016

Notes The diversification by net asset value analysis is based on the fair value of the underlying investments, as estimated by the investment manager. Diversification by stage, phase, and geography is based on the estimated net asset value of partnership investments within HVPE's fund-of-funds and company investments within HVPE's co-investment funds. Industry diversification is based on the reported value of the underlying company investments for both fund-of-funds and co-investment funds. Some of the funds held in HVPE have not been fully invested. The composition of investments by phase, stage, geography, strategy, and industry may change as additional investments are made and existing investments are realised. By phase, growth includes vintage years 2007 to 2011, mature includes vintage years pre-2007, and investment includes vintage years 2012 to 2016.
