April Highlights

In April, HVPE committed \$25.0 million to HarbourVest 2019 Global Fund, a multi-strategy fund split across buyout, venture, and special situations. At the end of April, HVPE's shares reached £15.10 - an increase of approximately 5.6% during the month. Since then, the share price has continued to perform well and on 16 May (latest available) closed at £15.42, an all time high. HVPE will publish its Annual Report and Accounts for the 12 months to 31 January 2019 on 29 May 2019. The full report will be available to view online at www.hvpe.com.

The Private Equity Cycle

HVPE invests in and alongside HarbourVest-managed funds which focus on primary fund commitments, secondary investments and direct co-investments in operating companies. These in turn drive a steady pace of direct and indirect investment into private company opportunities. These investments develop and grow over a period of several years, before being exited. Proceeds from these distributions then provide the fuel for new commitments and the lifecycle continues.

Diversification at 30 April 2019

Consistent with HVPE's investment objective, the Investment Manager strives to manage risk through diversification within the portfolio.

Notes: The diversification by net asset value analysis is based on the fair value of the underlying investments, as estimated by the investment manager. Diversification by stage, phase, and geography is based on the estimated net asset value of partnership investments within HVPE's fund-of-funds and company investments within HVPE's co-investment funds. Industry diversification is based on the reported value of the underlying company investments for both fund-of-funds and co-investment funds. Some of the funds held in HVPE have not been fully invested. The composition of investments by phase, stage, geography, strategy, and industry may change as additional investments are made and existing investments are realised. By phase, mature includes vintage years pre-2010, growth includes vintage years 2010 to 2014, and investment includes vintage years 2015 to 2019.

Valuation Methodology: HVPE carries its investments at fair value in accordance with US generally-accepted accounting principles. HVPE's Investment Manager uses the best information it has available to estimate fair value. Fair value for private equity assets is based on the most recent financial information provided by the Investment Manager, adjusted for known investment operating expenses and subsequent transactions, including investments, realisations, changes in foreign currency exchange rates, and changes in value of public securities. Valuation adjustments are made for known significant events, if any, that affect the fair value of the investments. The 30 April 2019 estimated NAV is based on final investment values at 31 December 2018 for 100% of the HarbourVest funds in the portfolio. This includes 100% final 31 December valuations for company investments within the direct co-investment portfolio and 100% of partnership valuations within the fund-of-funds. Note: 10% of the investment portfolio is represented by public companies and these have been updated to reflect 30 April 2019 public market prices. Consistent with previous estimated NAV reports, valuations are also adjusted for foreign exchange movements, cashflows, and any known material events to 30 April 2019.
