## August Comment

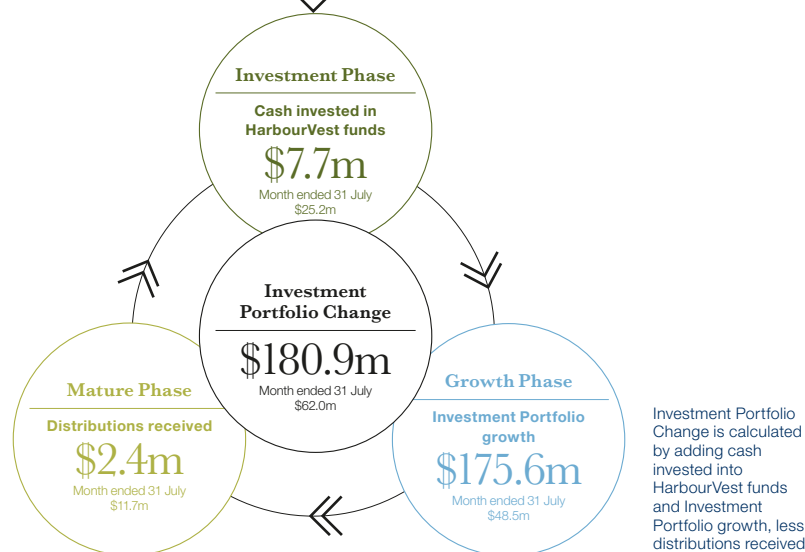

The 31 August 2020 estimated NAV per share of \$28.45 (£21.28) represents an uplift of 8.3% in US dollar terms over the previous month.

The significant increase in the 31 August 2020 NAV resulted from positive valuation gains across the portfolio, following receipt of 30 June 2020 marks. These have reflected strong, largely unrealised gains across all strategies since the previous report, which was based primarily on 31 March 2020 valuations.

## The Private Equity Cycle

HVPE invests in and alongside HarbourVest-managed funds which focus on primary fund commitments, secondary investments and direct co-investments in operating companies. These in turn drive a steady pace of direct and indirect investment into private company opportunities. These investments develop and grow over a period of several years, before being exited. Proceeds from these distributions then provide the fuel for new commitments and the lifecycle continues.

## Diversification at 31 August 2020

Consistent with HVPE's investment objective, the Investment Manager strives to manage risk through diversification within the portfolio.

**Notes:** The diversification by net asset value analysis is based on the fair value of the underlying investments, as estimated by the investment manager. Diversification by stage, phase, and geography is based on the estimated net asset value of partnership investments within HVPE's fund-of-funds and company investments within HVPE's co-investment funds. Industry diversification is based on the reported value of the underlying company investments for both fund-of-funds and co-investment funds. Some of the funds held in HVPE have not been fully invested. The composition of investments by phase, stage, geography, strategy, and industry may change as additional investments are made and existing investments are realised. By phase, mature includes vintage years pre-2011, growth includes vintage years 2011 to 2015, and investment includes vintage years 2016 to 2020.
