April Comment

The 30 April 2021 estimated NAV per share of \$36.62 (£26.49) represents an uplift of 3.5% in US dollar terms over the previous month. This growth in NAV per share was driven primarily by increases in the value of listed company exposures and by gains arising from inclusion of the remaining 31 December valuations.

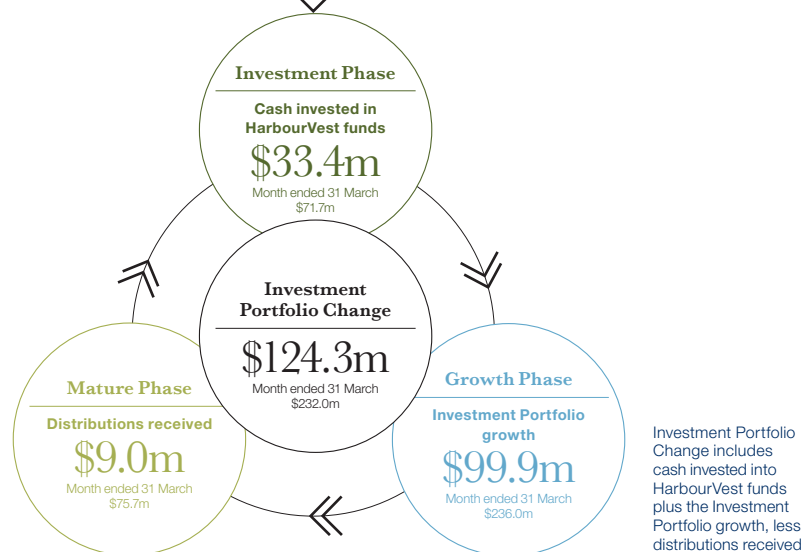

The Private Equity Cycle

HVPE invests in and alongside HarbourVest-managed funds which focus on primary fund commitments, secondary investments and direct co-investments in operating companies. These in turn drive a steady pace of direct and indirect investment into private company opportunities. These investments develop and grow over a period of several years, before being exited. Proceeds from these distributions then provide the fuel for new commitments and the lifecycle continues.

Diversification at 30 April 2021

Consistent with HVPE’s investment objective, the Investment Manager strives to manage risk through diversification within the portfolio.

Notes: The diversification by net asset value analysis is based on the fair value of the underlying investments, as estimated by the investment manager. Diversification by stage, phase, and geography is based on the estimated net asset value of partnership investments within HVPE’s fund-of-funds and company investments within HVPE’s co-investment funds. Industry diversification is based on the reported value of the underlying company investments for both fund-of-funds and co-investment funds. Some of the funds held in HVPE have not been fully invested. The composition of investments by phase, stage, geography, strategy, and industry may change as additional investments are made and existing investments are realised. By phase, mature includes vintage years pre-2012, growth includes vintage years 2012 to 2016, and investment includes vintage years 2017 to 2021.
