January Comment

Recently, HVPE featured prominently in two press articles in the Investors' Chronicle ("IC") and The Daily Telegraph. The IC says: "Buy HarbourVest Global for diversified private equity" with HVPE's long-term performance, recent valuation uplifts, and discount to net asset value highlighted as particular strengths. The Daily Telegraph suggests HVPE is a "hold" for its tech exposure (29%) and references analyst Stifel's view that the inherent time lag in reporting 31 December 2020 valuations presents a potential opportunity.

The Private Equity Cycle

HVPE invests in and alongside HarbourVest-managed funds which focus on primary fund commitments, secondary investments and direct co-investments in operating companies. These in turn drive a steady pace of direct and indirect investment into private company opportunities. These investments develop and grow over a period of several years, before being exited. Proceeds from these distributions then provide the fuel for new commitments and the lifecycle continues.
