Building Long-term Wealth by Investing in Private Companies

What is HarbourVest Global Private Equity Limited?

HarbourVest Global Private Equity Limited (“HVPE” or the “Company”) is a London listed, FTSE 250 private equity investment company with assets of \$2.8 billion (HVPE’s functional currency is the US dollar) and a market capitalisation of approximately £1.5 billion as at 31 March 2021 (tickers: £ HVPE | \$ HVPD). HVPE invests in private companies and portfolios of private companies through funds managed by HarbourVest Partners, an innovative global private markets asset manager with more than 35 years of experience. HVPE is designed to offer shareholders long-term capital appreciation by investing in a private markets portfolio diversified by geography, strategy, stage of investment, vintage year, and sector. By following a consistent and proven investment strategy, HVPE has delivered steady and robust NAV growth and has outperformed the public markets since inception, as measured by the FTSE All-World Total Return (“TR”) index.

Why Invest

Holding shares in HVPE provides investors with a well-managed, ready-made global private equity programme and gives part-ownership of a diversified portfolio of underlying private companies*, spanning investment stages from early venture to large-cap buyouts. Many of these companies have the potential to become tomorrow’s household names.

Estimated NAV per Share Reconciliation (movement through month) (\$)

The NAV breakdown is an estimate. Please note that amounts in the month are adjusted as final valuations are received from prior quarters. See **Valuation Methodology** on page four for further details.

* Holdings in publicly-traded companies, often resulting from IPOs in the private equity portfolio, represent 14% of HVPE’s investment portfolio value.

March Comment

The 31 March 2021 estimated NAV per share of \$35.38 (£25.67) represents an uplift of 9.1% in US dollar terms over the previous month. The significant increase resulted from positive valuation gains across all strategies in the portfolio, most notably the direct co-investment and real assets funds following receipt of the majority of 31 December 2020 marks. Broad-based gains in the private holdings were partially offset by FX and a decline in the value of the listed company exposures in the month.

The Private Equity Cycle

HVPE invests in and alongside HarbourVest-managed funds which focus on primary fund commitments, secondary investments and direct co-investments in operating companies. These in turn drive a steady pace of direct and indirect investment into private company opportunities. These investments develop and grow over a period of several years, before being exited. Proceeds from these distributions then provide the fuel for new commitments and the lifecycle continues.

Month ended 31 March 2021

Investments (Investment Phase)

In March, capital calls from underlying partnerships (by value) were split between real assets, buyout and venture strategies at 49%, 26% and 20%, respectively. Of the total amount called, the majority (55%), was from partnerships with a Europe investment focus.

Top Five Investing Partnerships

Managing HVPE

Credit facility

If future investments exceed distributions for a sustained period, it is important that HVPE is able to access funding as required to meet any shortfall.

At 31 March 2021, HVPE had a cash balance of \$142.3 million and access to a further \$450.0 million on its \$600.0 million credit facility.

HarbourVest Partners (“HVP”) fund-level borrowing

At 31 March 2021, HVPE’s share of HVP fund-level borrowing, on a look-through basis, was \$357.1 million. Please refer to hvpe.com/financial-performance/financial-resources for further details.

Investment Pipeline and commitment ratios

The Board and Investment Manager make reference to three key ratios when assessing the Company’s commitment levels, as shown here.

Total Commitment Ratio at 31 March 2021

(Total exposure to private markets investments as a percentage of NAV)

| | |
|--|-------------|
| Investment Portfolio + Investment Pipeline | \$4,337.6m |
| Divided by the NAV | \$2,825.7m |
| (12 month range: 154% to 183%) | 154% |

Rolling Coverage Ratio at 31 March 2021

(A measure of medium-term commitment coverage)

| | |
|--|------------|
| Cash + Available Credit Facility (\$) + Current Year Estimated Realisations (\$) | \$960.7m |
| Divided by the Next Three Years’ Estimated Investments | \$1,365.1m |
| (12 month range: 62% to 70%) | 70% |

Commitment Coverage Ratio at 31 March 2021

(Short-term liquidity as a percentage of total Investment Pipeline)

| | |
|------------------------------------|------------|
| Cash + Available Credit Facility | \$592.3m |
| Divided by the Investment Pipeline | \$1,508.1m |
| (12 month range: 35% to 39%) | 39% |

Diversification at 31 March 2021

Consistent with HVPE’s investment objective, the Investment Manager strives to manage risk through diversification within the portfolio.

Notes: The diversification by net asset value analysis is based on the fair value of the underlying investments, as estimated by the investment manager. Diversification by stage, phase, and geography is based on the estimated net asset value of partnership investments within HVPE’s fund-of-funds and company investments within HVPE’s co-investment funds. Industry diversification is based on the reported value of the underlying company investments for both fund-of-funds and co-investment funds. Some of the funds held in HVPE have not been fully invested. The composition of investments by phase, stage, geography, strategy, and industry may change as additional investments are made and existing investments are realised. By phase, mature includes vintage years pre-2012, growth includes vintage years 2012 to 2016, and investment includes vintage years 2017 to 2021.

Valuation Methodology: HVPE carries its investments at fair value in accordance with US generally-accepted accounting principles. HVPE's Investment Manager uses the best information it has available to estimate fair value. Fair value for private equity assets is based on the most recent financial information provided by the Investment Manager, adjusted for known investment operating expenses and subsequent transactions, including investments, realisations, changes in foreign currency exchange rates, and changes in value of public securities. The valuation breakdown of the HVPE portfolio as reported here is as follows: 14% actual 31 March 2021 (representing the public companies in the portfolio); 72% actual 31 December 2020; and 14% actual 30 September 2020. Consistent with previous estimated NAV reports, valuations are also adjusted for foreign exchange movements, cashflows, and any known material events to 31 March 2021. All investments are subject to risk. Past performance is no guarantee of future returns. Prospective investors are advised to seek expert legal, financial, tax, and other professional advice before making any investment decision. The value of investments may fluctuate.
