The Private Equity Cycle

Month ended 31 August 2026

HarbourVest Global Private Equity Limited ("HVPE" or the "Company") invests in and alongside HarbourVest-managed funds which focus on primary fund commitments, secondary investments and direct co-investments in operating companies. These in turn drive a steady pace of direct and indirect investment into private company opportunities. These investments develop and grow over a period of several years, before being exited. Proceeds from these distributions then provide the capital for new commitments and the lifecycle continues.

The diversification by net asset value analysis is based on the fair value of the underlying investments, as estimated by the investment manager. Diversification by stage, phase, currency and geography is based on the estimated net asset value of partnership investments within HVPE's fund of funds and company investments within HVPE's co-investment funds. Industry diversification is based on the reported value of the underlying company investments for both fund of funds and co-investment funds. Some of the funds held in HVPE have not been fully invested. The composition of investments by phase, stage, geography, strategy, and industry may change as additional investments are made and existing investments are realised. By phase, mature includes vintage years pre-2017, growth includes vintage years 2017 to 2021, and investment includes vintage years 2022 to 2026.

The Board and Investment Manager make reference to three key ratios when assessing the Company’s commitment levels, as shown below.

Valuation Methodology:

HVPE carries its investments at fair value in accordance with US generally-accepted accounting principles. HVPE’s Investment Manager uses the best information it has available to estimate fair value. The valuation breakdown of the HVPE portfolio as reported here is as follows: 7% actual 31 August 2026 (representing public company holdings), 92% actual 30 June 2026, and 1% actual 31 March 2026. Consistent with previous estimated NAV reports, valuations are also adjusted for foreign exchange movements, cashflows, and any known material events to 31 August 2026.
