Commentary

The estimated NAV per share of \$56.46 (£42.74) at 31 July 2025 represents a 0.3% increase in US dollar terms over the previous month. The Distribution Pool balance at 31 July was \$36.9 million, while share buybacks during the month totaled \$5.0 million.

The Private Equity Cycle

HarbourVest Global Private Equity Limited ("HVPE" or the "Company") invests in and alongside HarbourVest-managed funds which focus on primary fund commitments, secondary investments and direct co-investments in operating companies. These in turn drive a steady pace of direct and indirect investment into private company opportunities. These investments develop and grow over a period of several years, before being exited. Proceeds from these distributions then provide the capital for new commitments and the lifecycle continues.

The diversification by net asset value analysis is based on the fair value of the underlying investments, as estimated by the investment manager. Diversification by stage, phase, currency and geography is based on the estimated net asset value of partnership investments within HVPE's fund of funds and company investments within HVPE's co-investment funds. Industry diversification is based on the reported value of the underlying company investments for both fund of funds and co-investment funds. Some of the funds held in HVPE have not been fully invested. The composition of investments by phase, stage, geography, strategy, and industry may change as additional investments are made and existing investments are realised. By phase, mature includes vintage years pre-2016, growth includes vintage years 2016 to 2020, and investment includes vintage years 2021 to 2025.
