 - **14% of Investment Portfolio (public company holdings) valued at 31 December 2021; with remainder valued at 30 September 2021**
- **Positive cash flow during the month with a net \$46.6m received**
- **New commitments of \$512.5m in the month helped raise the Total Commitment Ratio closer to normal levels**

HarbourVest Global Private Equity Limited (“HVPE” or the “Company”), a closed-end investment company, today announces its estimated Net Asset Value (“NAV”) at 31 December 2021.

HVPE provides a complete private equity solution for public investors, managing the portfolio through four phases of the private equity cycle to create value: Commitments, Investment, Growth, and Realisation.

Commitments

In line with the Investment Manager’s plan to increase the level of new commitments (as communicated in HVPE’s 2021 semi-annual report), during December, HVPE made total new commitments of \$512.5 million. This included an additional commitment of \$365.0 million to an international multi-strategy fund of funds, an additional commitment of \$145.0 million to a global multi-strategy fund of funds and a \$2.5 million commitment to a secondary co-investment transaction. The new commitments, alongside foreign exchange rate movements, contributed to a net increase of \$434.2 million in HVPE’s Investment Pipeline (unfunded commitments), which totalled \$2.5 billion at 31 December 2021.

Investment

During December, HVPE invested \$78.4 million into HarbourVest funds (compared to \$50.5 million in November 2021). The largest individual investment during the month was made to a 2020 vintage international fund of funds.

Growth

At 31 December 2021, HVPE’s estimated NAV per share was \$46.80 (£34.58), compared to the 30 November 2021 estimate of \$45.71 (£34.37). This represents an uplift of 2.4% in US dollar terms over the previous month, driven largely by gains in the fund of funds following receipt of the remaining 30 September valuations.

The valuation breakdown of the HVPE portfolio as reported here is as follows: 14% actual 31 December 2021 (representing the public companies in the portfolio); and 86% actual 30 September 2021. Consistent with previous estimated NAV reports, valuations are also adjusted for foreign exchange movements, cashflows, and any known material events to 31 December 2021.

Realisation

HVPE received \$125.0 million of distributions from HarbourVest funds during December 2021 (compared to \$131.8 million in November 2021). The largest source of proceeds came from a 2011 vintage US-focused venture fund of funds. During December, there were a total of 46 M&A transactions and IPOs across HVPE's underlying portfolio compared to November's 31, and a last 12-month average of 46.

Balance Sheet and Credit Facility

At 31 December, HVPE had the full \$700.0 million available on its credit facility. Borrowing at the HarbourVest fund level amounted to \$445.4 million, an increase of \$33.2 million from the previous month. HVPE's cash and cash equivalents (\$297.7 million) and available credit (\$700.0 million) totalled \$997.7 million.

Epidemics, Pandemics and Other Health Risks - Many countries have experienced infectious illnesses in recent decades, including swine flu, avian influenza, SARS and 2019-nCoV (the "Coronavirus"). In December 2019, an initial outbreak of the Coronavirus was reported in Hubei, China. Since then, a large and growing number of cases have been confirmed around the world. The Coronavirus outbreak has resulted in numerous deaths and the imposition of both local and more widespread "work from home" and other quarantine measures, border closures and other travel restrictions causing social unrest and commercial disruption on a global scale. The World Health Organization has declared the Coronavirus outbreak a pandemic. The ongoing spread of the Coronavirus has had and will continue to have a material adverse impact on local economies in the affected jurisdictions and also on the global economy as cross-border commercial activity and market sentiment are increasingly impacted by the outbreak and government and other measures seeking to contain its spread. In addition to these developments having potentially adverse consequences for underlying portfolio investments of the HarbourVest funds and the value of the investments therein, the operations of HVPE, the Investment Manager, and HVPE's portfolio of HarbourVest funds have been, and could continue to be, adversely impacted, including through quarantine measures and travel restrictions imposed on personnel or service providers based around the world, and any related health issues of such personnel or service providers. Any of the foregoing events could materially and adversely affect the Investment Manager's ability to source, manage and divest its investments and its ability to fulfil its investment objectives. Similar consequences could arise with respect to other comparable infectious diseases.
